

Courses in English

Course Description

| | |
|--------------------------------|---|
| Department | 02 Civil Engineering |
| Course title | Foundation Engineering (vorher: Special Geotechnical Works) |
| Hours per week (SWS) | 4 |
| Number of ECTS credits | 5 |
| Course objective | Deeper understanding of ground behaviour on scientific basis and construction technology. The student should gain the competence in designing sophisticated geotechnical structures as well as in proving stability and serviceability. |
| Prerequisites | Module 105 and 106: Soilmechanics with placement, foundation ground engineering |
| Recommended reading | During the course |
| Teaching methods | Lectures in small groups, tutorials, self studying units, presentations, etc. |
| Assessment methods | Written examination |
| Language of instruction | English |
| Name of lecturer | Prof. Dr. Slominski |
| Email | cezary.slominski@hm.edu |
| Link | |
| Course content | Detailed content will be provided by lecturer |
| Remarks | None |
