Course content	Practical Insights in the Potential of Law for Business People
Remarks	Based on the provided information, the learning objectives and competencies for this module focus on developing practical legal skills and understanding for business students. The key points are: Students gain hands-on experience with applying law in business contexts, developing their own methodology for secure decision-making and innovation. They learn to maintain oversight in interdisciplinary teams, steer processes thoughtfully, and utilize the potential of law in leadership roles. Critical thinking and leadership competencies are developed through questioning and analysis. Students experience real-world regulatory practices and develop legally sound positions on various legal issues. They learn about the legislative process and how to influence it in practice. The content covers practical aspects such as: Law and compliance, Legal department services in companies, Observing lawyers and business mediators at work, Experiencing court proceedings firsthand, Incorporating business interests into legislation, Developing and strategically promoting economic policy positions
