Munich’s University of Applied Sciences is Bavaria’s largest university for applied sciences: Over 80 attractive and future-oriented degree programmes form the basis for a successful career. In addition to professional skills, the university promotes sustainable and entrepreneurial thinking and behaviour as well as international and intercultural experience, e.g. through international exchange programmes.

The departments prepare students to contribute to their professions and society with vision, creativity and a sense of responsibility. Close contacts with companies in the high-tech location of Munich ensure practical experience already during the studies. And don’t forget: Munich’s attractive cultural and leisure activities offer plenty of variety.

The Master Paper Technology in Munich is a unique study course conducted entirely in English, attracting students from over ten different nations. As part of this international and capital-intensive sector, you will learn about the various aspects of paper and cardboard manufacturing while covering a wide range of industry-related topics.

Customize your learning experience by choosing from an array of elective subjects, with support from the industry and the Institute for Paper Technology (IVP). Engage with up-to-date technology and equipment in well-resourced laboratories, creating an environment that fosters creativity and innovation. Create your own newspaper on a pilot paper machine, while developing your skills through hands-on laboratory work and research projects.

Expect small class sizes and a supportive academic atmosphere. Benefit from an excellent network of well-known companies in the industry and international partner universities.

The Master Paper Technology equips you for leadership roles within the global paper industry.
First class job prospects are available for graduates of the Master programme. Graduates have very good chances of an interesting career in the world of paper and board.

The paper industry offers many opportunities in production, research and development, as well as in the engineering and supply industry. A Master in Paper Technology provides a wide range of possibilities including mill manager or member of the board of executives.

Those careers are not only reserved for men, as has been proven by a number of very successful female students in the past.

The paper industry is becoming increasingly global, thus favouring our highly international study at Munich University of Applied Sciences.
