Research Project
LokU 2.0
Local support chains for young newly arrived immigrants

Project term
Feb 2023 – Jan 2026
Project number: 01UP2227
We are interested in local support chains and the impact of the Corona and the post-pandemic situation on vocational training and labor market-related volunteering for young, newly arrived immigrants. We use a mixed-methods approach to capture the consequences and potential for socially supportive networks in large cities.
